Construction Methods

Injection Mold

This is SKB's latest venture in our quest to provide the most innovative hard shell case products. Injection molding is an expensive investment and there is no room for error. Made with extreme pressure, even the smallest injection molded part requires a very large and heavy mold. SKB has molds that are nearly 20 tons! Many of our parts, such as our patented Trigger Latches are produced by the injection mold process. Our 3i case series includes a gasket that makes the case watertight and dust proof. Our latest injection molded cases for guitars and basses are very popular with touring musicians. These cases have dual lives as they are also used for military weapons. Never before has an ATA flight case been so lightweight, yet so advanced.

Roto-Mold

In 1997, SKB invested in roto-mold machinery. These molds are ideal for making larger cases and cylindrical cases. The PE roto-mold material starts as a fine powder that is measured according to the size of the case. The material is then sealed up in a multi-piece aluminum mold and fixed on a biaxial rotating wheel. The material is heated at 800° in a very large oven while constantly rotating. The powder melts and coats the inside of the mold and after cooling, the cast is disassembled and the case is removed. Roto-Molding is great for providing maximum protection and can withstand maximum impact in transport.

Our Story

SKB Co-Founders: Dave Sanderson & Steve Kottman

In 1977, two ambitious college students developed the first SKB case in a small Anaheim, California garage. What would eventually become the industry's premier lightweight molded guitar case was just the first of many innovations that have since cemented SKB's global reputation as a leading manufacturer of superior equipment transportation solutions. These solutions are helping diverse industries around the world—from music and photography to sports, aerospace, military, industrial, and beyond—to protect their livelihoods, build better products, and get the job done.

If our 40 years of steady growth have taught us anything, it's that we have our customers to thank for giving us the opportunity to excel; it's their challenges that have allowed us to develop and grow. We at SKB are grateful for the continued trust and loyalty of our customers, and we remain dedicated to the assurance that every case with an SKB logo has been manufactured with an unconditional commitment to unsurpassed quality.

Building A Better Camera Case

Every photographer or videographer's setup is different. That's why most hard shell case companies create camera cases with "Pick-and-Pluck" (cubed) foam interiors so customers can customize their cases to fit their gear. However, the reality is that cubed foam interiors can break down over time, and the resulting foam dust isn't friendly to sensitive camera parts and lenses.

Camera case customers would never think to buy a camera bag or backpack with this type of foam interior, so why do hard shell case companies think this is an appropriate solution?

In addition to being the only case company to offer a variety of high quality PE foam specifically cut for photo and video products, SKB provides padded dividers as an alternative to cubed foam in our camera cases. But we knew these dividers could be improved upon. After all, building tough-as-nails hard shell cases is our specialty—developing superior camera case interiors is someone else's. And we're proud to say we've teamed up with the best in the business to make sure we could deliver the ultimate in camera and video transport solutions available today.

Think Tank Photo, *the* premier photo/video bag and backpack company, provided their expertise to help us design several quality interiors that combine the best of both worlds: soft case adaptability with the unparalleled strength and durability people expect from SKB's versatile watertight, airline-tough iSeries cases.

You'll see the results of this exceptional collaboration on the upcoming pages. With the design and manufacturing help of Think Tank Photo, SKB will expand an entire series of products under the Photo Flyer Series including dividers designed specifically for photographers and videographers, lid organizers that are perfect for storing tablets, laptops, and other accessories, as well as a bunch of game-changing innovations yet to come.

We understand that securely transporting expensive, sensitive, and highly customized gear is the number one priority for every pro photographer and videographer. With Think Tank's collaboration, we're confident we've developed the perfect solution—and we think you'll agree.

Travel confidently with your SKB case.
