Our Story

SKB Owners/Founders: Dave Sanderson and Steve Kottman

In 1977, two ambitious college students developed the first SKB case in a small Anaheim, California garage. What would eventually become the industry's premier lightweight molded guitar case was just the first of many innovations that have since cemented SKB's global reputation as a leading manufacturer of superior equipment transportation solutions. These solutions are helping diverse industries around the world—from music and photography to sports, aerospace, military, industrial, and beyond—to protect their livelihoods, build better products, and get the job done.

If our 40 years of steady growth have taught us anything, it's that we have our customers to thank for giving us the opportunity to excel; it's their challenges that have allowed us to develop and grow. We at SKB are grateful for the continued trust and loyalty of our customers, and we remain dedicated to the assurance that every case with an SKB logo has been manufactured with an unconditional commitment to unsurpassed quality.

One of our injection molders in action

Injection Mold

This is SKB's latest venture in our quest to provide the most innovative hard shell case products. Injection molding is an expensive investment that leaves no room for error. Made with extreme pressure, even the smallest injection molded part requires a very large and heavy mold (some of SKB's molds are nearly 20 tons!). The injection mold process produces many of our parts—such as our patented Trigger Latches—and our gasket-sealed waterproof iSeries cases are proving to be popular transport solutions for everyone from touring musicians to military personnel. Never before has an ATA flight case been so advanced and lightweight.

Molds rotating during production

Roto-Mold

In 1997, SKB invested in roto-mold machinery. These molds are ideal for making large and cylindrical cases. The PE roto-mold material starts as a fine powder that is measured according to the size of the case. The material is then sealed up in a multi-piece aluminum mold, fixed on a biaxial rotating wheel, and heated to 800° in a very large oven while the mold constantly rotates. The powder melts and coats the inside of the mold and, after cooling, the cast is disassembled and the new case is removed. Roto-molding is great for providing maximum transport protection and impact resistance.

Vacuum mold for keyboard case

Vacuum Form

Also known as thermal form, this was the first and most recognized "SKB Style" case. This method is very popular for everything from guitar and band instrument cases to golf cases, rifle cases, and more. In 1990, SKB developed the first vacuum formed rack case. Acrylonitrile Butadiene Styrene (ABS) or Polyethylene (PE) is formed into solid sheets of material. The sheets are then heated and vacuum formed around aluminum castings, thus taking the shape of the mold. The edges have a distinctive aluminum valance that provides rigid construction as well as a secure fit. Vacuum formed products are known for their light weight and extreme durability.

iSeries Guitar & Bass Cases

iSeries Injection Molded Watertight Cases

i series

- High-Strength, lightweight, Injection Molded Polypropylene Copolymer Resin
- Watertight gasket seal
- Easy to use TSA locking trigger latches
- Convenient quiet-glide wheels
- Plush lined EPS molded interior
- Comfort grip rubber over-molded handles
- Self-Sealing large accessory compartments
- Secure stackable design
- Automatic Pressure Equalization Valve
- Lifetime Warranty

Cello Cases

SKB offers a variety of Cello cases that are perfect for any situation. From a soft-sided case to a rugged roto-molded shell, each case provides superior protection. The 1SKB-544 is an extremely durable roto-molded shell with two internal nylon bow pockets and separate rosin pockets. In-line skate wheels and ergonomically placed sure-grip handles make for easy transport. The 1SKB-344, a vacuum formed shell, includes a molded, plush-lined EPS interior to securely hold instruments in transport. A molded internal pocket cover provides full neck support. The 1SKB-SC344 shares the same interior as the 1SKB-344, but wrapped in a ballistic nylon outer cover.
