PRODUCT FEATURES

Digital Clarity meets Analog Warmth

The euphonia produces a euphoric sound with the clarity of digital and the richness of analog that's never been heard from a DJ mixer before.

Digital and analog circuitry makes mixing easier and surprisingly natural.

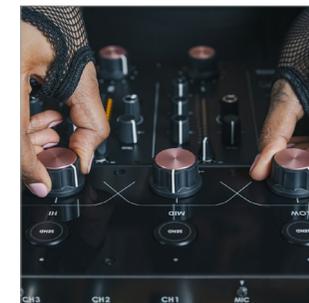

Energy Visualizer

The uniquely developed Mix Level Meter features a needle meter for each channel so you can visually check the levels for all channels and mix smoothly while keeping the groove going. You can even keep an eye on the balance of the Master output by looking at the Spectrum Analyzer.

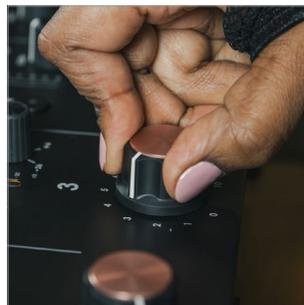

Rupert Neve Designs transformer

All sound coming out of the euphonia passes through a transformer circuit co-designed by AlphaTheta and Rupert Neve Designs. This transformer circuit adds harmonics to the music and creates a glossy and energetic sound that's smoother for mixing.

Next-generation 3 Band Master Isolator

Enjoy a more sensory level of control over your music with the 3Band Master Isolator, which was custom designed for both quick operation and fine sound quality adjustment. And with the Boost Send and Boost Level features, there are even more creative options at your fingertips.

Specially developed rotary fader

When you touch the rotary faders on the euphonia, you won't want to let go. They feature a comfortable grip thanks to the elastomer on the outer circumference and innovative optimum weighting. Higher load is applied when you turn slowly for delicate fine-tuning and a lower load level is applied when you turn quickly.

Built-in Send FX

The euphonia features 5 built-in spatial effects and a high-pass filter, so you can easily add depth and breadth to your music. These are: Delay, Tape Echo, Echo Verb, Reverb, Shimmer, and HPF.

There's also a Send/Return section which gives you the option to connect external effects units.

About AlphaTheta Corporation: AlphaTheta EMEA Limited is the subsidiary of AlphaTheta Corporation responsible for sales and marketing in EMEA. For more than 20 years, its Pioneer DJ brand has been a market leader in the design and production of innovative DJ equipment and software. The company works closely with DJs and clubs to deliver next-generation products that inspire and shape the global dance music community and has recently launched a new range of musical instruments for production and live performances. Its portfolio includes brands such as AlphaTheta, Pioneer DJ, rekordbox, TORAIZ, Pioneer PRO AUDIO, and KUVU. AlphaTheta Corporation is in the Noritsu Koki (TSE:7744) Group, headquartered in Yokohama, Japan, and is led by President and CEO Yoshinori Kataoka.
