

TAPEBOOSTER

ref 9865

The TAPEBOOSTER is both an amplifier and a signal splitter compatible with the COLORTAPE and PURETAPE series, this signal booster allows you to link more LED ribbons together. It also amplifies the incoming signal if you combine it with an adequate power supply. The TAPEBOOSTER is ideal to connect more ribbons to the same controller in order to produce a uniform and consistent brightness.

TAPEDIMMER

ref 9866

1-channel dimmer for a 24 V ribbon. You can now set manually the brightness intensity of your PURETAPE ribbons with this easy-handling dimmer. It is ultra-compact and when combined with an adequate power supply can be used with as much as 432 W of 24 V PURETAPE.

120

TAPEDRIVER

ref 9867

This module is fully compatible with the COLORTAPE and PURETAPE series and convert your manual or DMX instructions into a power signal directly sent to the ribbons. Combined with an adequate power supply it can send instructions to one tricolor ribbon or 3 monochrome ribbons.

It uses 3 DMX channels and can be directly controlled via the PILOT-TOUCH or any other compatible DMX controller.

Model	TYPE	POWER	TIGHTNESS LEVEL	COLORTAPE COMPATIBLE	PURETAPE COMPATIBLE	OUTPUTS
TAPEBOOSTER	Amplifier	576 W max	-	Yes	Yes	1 RGB or 3 monochrome
TAPEDIMMER	Dimmer	432 W max	-	No	Yes	1
