SP 202

The SP202 is AUDAC's brand-new humidity proof bidirectional sound projector with a high efficiency level. The two loudspeakers facing in opposite directions make that the device is perfect for small as well as large projects.

Owing to its focussed radiation the SP202 can be mounted high up (max. 6 m). The speaker is intended for good speech intelligibility and background music. The enclosure is made of aluminium with a aluminium grille. The projector is suitable for indoor and outdoor applications.
