PROFESSIONAL HEADPHONES

Built for the gigging DJ, Producer or discerning music listener, the new Stanton DJ headphone line delivers a dynamic sonic range with deep bass response in modern, lightweight, and comfortable designs. Three new models deliver the sonic accuracy DJ's and Producers have come to expect and respect from Stanton Pro DJ products. Best of all, these three new models cover all possible performance and listening situations.

When you need to check your mix in confidence, the DJ Pro 800 headphones—designed for on-the-go DJs—provide everything you need, and nothing you don't. Or for longer club gigs, where background noise reduction is crucial along with high output, the new DJ 4000 headphone—complete with its eye-catching, blue ring accent light—will become your reliable, go-to choice.

Take your stage presence to a new level, the ground-breaking technology in the DJ 6000 wireless headphone slashes latency, raises fidelity beyond conventional wireless headphones, and gives you the freedom to step up, step out, and interact with your fans.
